C APP: 7a-4p shift (Feb Only)

Handoffs	Care Areas	Supervising Attending	Area Details
• 7A - Take signout only if an A Ambulance patient was moved to C pod - otherwise start fresh • 4p - Group signout to incoming C Pod Team	• C Pod	• C Attending	• C Pod: Prime Care Pod with telemetry and 4:1 Nursing • May be used as holding unit if boarding high (see below) • If not, will bring back 8 new patients at 7am (there will already be 8-10 admit holds in unit from overnight)

Other Things to Know

If boarding is high C Pod will be used as a holding unit and providers sent to help the active pods
- If boarding in C Pod: At 7am you flex to B Pod, replace the B/A APP, take signout from the B Pod overnight team and work in vertical.
  - This allows the B/A APP to start in A Pod at 7am
- If unit re-opens you should only flex back if there are >8 active beds (otherwise attending alone can manage)
